

# VorTex™

Rimex Metals VorTex™ finished stainless steel is the combination of a light non-directional finish on a bright base that draws you in as it reflects minor elements of its surroundings.

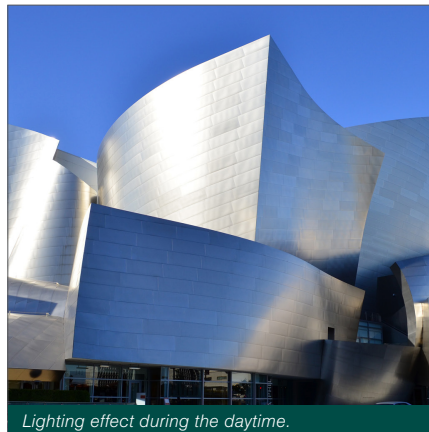

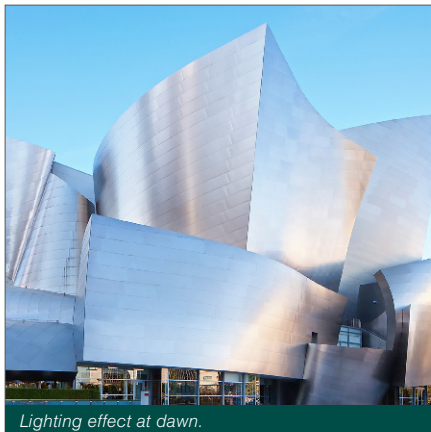

Specialists in Metal Finishes

## VorTex™

An excellent alternative to the No.4, satin polished stainless steel. The VorTex™ finish has a low RA rating which enhances the softer qualities of stainless steel in architectural design making it a great choice for cladding and street furniture.

Other suitable applications include bar or kitchen benchtops or anything where scratches from use can be disguised by the VorTex™ finish.

Vortex™ finishing can also be applied to our ColourTex™ (coloured) stainless steel and our T22™ (coloured) stainless steel product ranges.

State-of-the-art machinery provides us with tight manufacturing control of the VorTex™ finish and uniformity ensuring consistency in every batch produced.

The VorTex™ product is made in Australia.
