

Granex™

Often a subtle, understated finish can make a bold statement. Rimex Metals Granex™ finish does just that with its matt bead blasted stainless steel finish which delivers big on appeal whilst remaining unobtrusive.

Specialists in Metal Finishes

Granex™

The Granex™ finish is produced by blasting a stainless steel sheet with glass beads to achieve a uniform matt surface with low reflectivity.

Bead blasting can also be applied to our ColourTex™ (coloured) stainless steel and our T22™ (coloured) stainless steel product ranges.

The non-directional textured surface of Granex™ with its soft reflection and low reflectivity makes it an ideal cladding medium as well as being a great choice for street furniture, lift cars and doors, platform shelters and ceiling panels to name a few.

The Granex™ product is made in Australia.
